
Stefan Gregory LLEWELLYN SMITH

Address: Mechanical and Aerospace Engineering Dept.
University of California, San Diego
La Jolla, CA 92093-0411

Tel: (858) 822-3475
Fax: (858) 534-7599
E-mail: sgls@ucsd.edu

URL: <http://web.eng.ucsd.edu/~sgls>

Research interests:

- Fluid dynamics.
- Asymptotic methods.
- Applied and industrial mathematics.

Education:

- Queens' College, University of Cambridge, Oct 1993–Oct 1996. PhD research in the Department of Applied Mathematics and Theoretical Physics supervised by Professor D. G. Crighton on the topic *Vortices and Rossby-wave radiation on the beta-plane*. PhD awarded October 1996.
- Massachusetts Institute of Technology and Woods Hole Oceanographic Institution, Sep 1992–Sep 1993.
- Queens' College, University of Cambridge, Oct 1988–Jun 1992. Certificate of Advanced Study (Part III of the Mathematical Tripos) with Distinction, awarded June 1992. BA (Honours) First Class (Parts IA, IB & II), awarded June 1991.

Awards:

- Fellow, Division of Fluid Dynamics, American Physical Society, 2017.
- Outstanding Engineering Professor Award 2004, Jacobs School of Engineering, University of California, San Diego.
- First-prize winner, 2002 SIAM 100-dollar 100-digit contest.
- Chancellor's Summer Faculty Fellowship Award, 2001, University of California, San Diego.
- Hellman Fellowship 2001, University of California, San Diego.
- Faculty Career Development Program award 2001, University of California.
- Queens' College Research Fellowship, 1996–1999.
- Lindemann Trust Fellowship for post-doctoral research in the US, 1996–1997.
- Munro Studentship (for undergraduate teaching), Queens' College, 1995–1996.
- Smith Prize (mathematical essay – only category 1 prize awarded), University of Cambridge, 1995.
- Natural Environment Research Council (NERC) Studentship at the Department of Applied Mathematics and Theoretical Physics, University of Cambridge, 1993–1996.
- Paul McDonald Fye Fellow, Woods Hole Oceanographic Institution, 1992–1993.
- College Exhibitioner, Foundation and Bachelor Scholar, Queens' College, 1989–1992.
- Bronze Medal, British Physics Olympiad, 1988.

Experience:

- Professor, Scripps Institution of Oceanography, University of California, San Diego, Jul 2017–.
- Professor, Department of Mechanical and Aerospace Engineering, University of California, San Diego, Jul 2010–.
- Adjunct Professor, Scripps Institution of Oceanography, University of California, San Diego, Jul 2010–Jun 2017.
- Adjunct Associate Professor, Scripps Institution of Oceanography, University of California, San Diego, Jul 2007–Jun 2010.
- Associate Professor, Department of Mechanical and Aerospace Engineering, University of California, San Diego, Jul 2004–Jun 2010.
- Assistant Professor, Department of Mechanical and Aerospace Engineering, University of California, San Diego, Jul 1999–Jun 2004.
- Research Fellow, Queens' College, Cambridge, Oct 1996–Sep 1999.
- Post-doctoral researcher, Scripps Institution of Oceanography, Oct 1996–Sep 1997.
- Programmer, Cambridge Environmental Research Consultants, Cambridge, summer 1991. Writing a graphical front-end to a tunnel-fire simulation program under contract to the Health and Safety Executive and Eurotunnel.
- Programmer, CGI, Paris, summer 1990. Implementing a Windows port of a mainframe software suite.
- Data Security Consultant, EDS, Paris, summer 1989. Administering computer security for a multinational corporation.

Professional Activities:

- Poste rouge CNRS, IMFT, Toulouse, 2011–2012.
- Professeur invité, Université de Paris VII (Jan 2005).
- Professeur invité, Ecole Normale Supérieure, Paris (Nov 2004).
- Royal Society Study Visit grant to visit the Department of Physics of the University of Tokyo (April 1999).
- Exchange Grant (November 1998) from the Transport Processes in the Atmosphere and the Oceans programme of the European Science Foundation to carry out research at IFREMER (Institut Français de Recherche pour l'Exploitation de la Mer).
- Field work: Participated in testing cruise for the R/V Roger Revelle, August 1996.
- Editor, Euromech Newsletter, 1995–1996.
- Supervised first, second and third year, and Part III (graduate level) applied mathematics courses for Queens', Sidney Sussex, Christ's and St. Edmund's Colleges, Cambridge. 1994–1999.
- Director of Studies in Mathematics, Clare Hall, Cambridge. 1997–1999.
- Participant in European Study Groups for Industry workshops, 1995, 1996 and 1998.
- Member of staff, WHOI GFD Summer School 1997, 1998, 1999, 2005, 2006. Co-director, 2004, 2013. Faculty, 2007–
- Referee for *J. Fluid Mech.*, *Proc. R. Soc. Lond. A*, *Math. Rev.*, *J. Phys. Oceanogr.*, *J. Acoust. Soc. Am.*, *Wave Motion*, *Phys. Fluids*, *Dyn. Atmos. Oceans*, *PAGEOPH*, *J. Mar. Res.*, *J. Eng. Math.*, *Q. J. Roy. Met. Soc.*, *J. Atmos. Ocean. Tech.*, *Cont. Shelf. Res.*, *Acoustics Research Letters Online*, *Deep-Sea Res.*, *Theor. Comp. Fluid Dyn.*, *Int. J. Eng. Sci.*, *J. Geophys. Res. Oceans*, *J. Geophys. Res. Atmos.*, *Geophys. Res. Lett.*, *Ocean Modelling*, *Eur. Phys. J. Appl. Phys.*, *Chem. Eng. Sci.*, *ASCE J. Eng. Mech.*, *Phil. Trans. R. Soc. Lond. A*, *Q. J. Mech. Res.*, *Proc. Natl. Acad. Sci.*, *J. Sound Vib.*, *Scientific Reports*, *PRIMUS*, *J. Nonlinear Sci.*, *Phys. Rev. Fluids*, *Phys. Lett. A*, NSF, Human Frontier Science Program, Hellenic Republic "Thalis" program, Sultan Qaboos University, New Zealand Ministry of Science and Innovation, Kazakhstan Ministry of Education and Science, South African national Research Foundation, Cambridge University Press, Elsevier Academic Press and Wiley.
- Member: American Physical Society.
- At large executive committee member, American Physical Society Division of Fluid Dynamics 2008–2011.
- Wrote *J. Fluid Mech.* Bibtex style file
(see <ftp://ftp.cup.cam.ac.uk/pub/texarchive/journals/latex/jfm-cls/bst>).
- Associate Editor, *J. Fluid Struct.* 2010–2017.
- Associate Editor, *SIAM J. Appl. Math.* 2013–2018.

-
- Editorial Advisory Board, *Q. J. Mech. Appl. Math.* 2013–2023.
 - Editorial Advisory Board, *Fluid Dyn. Res.* 2020–
 - International Organizing Committee, 2013 IUTAM Symposium on Vortex Dynamics, Fukuoka.
 - Co-organizer, Banff International Research Station workshop *Modern Applications of Complex Variables: Modeling, Theory and Computation*, January 2015.
 - Organizing Committee, *Frontiers in Applied & Computational Mathematics*, Newark, June 2015.
 - Co-organizer, Isaac Newton Institute Programme *Complex analysis: techniques, applications and computations*, September–December 2019.

Invited talks:

2002: Llewellyn Smith, S. G. & Young, W. R. Tidal conversion. Workshop on Global Bathymetry for Oceanography, Geophysics, and Climatology. Scripps Institution of Oceanography, October 2002.

2006: Llewellyn Smith, S. G. *et al.* Internal-wave interactions with vortices and topography: NIO dispersion and generation of internal tides. CAOS Workshop, Courant Institute, New York University, December 2006.

2009: Llewellyn Smith, S. G. Fluid instability, the continuous spectrum and asymptotic models & Vortex axisymmetrization. Kyushu University Workshop “Math-for-Industry Tutorial: Spectral theories of non-Hermitian operators and their application”, March 2009.

2011: Llewellyn Smith, S. G., Davis, A. M. J. & Martin, P. A. Boundary integral methods for internal waves. Geophysical and Astrophysical Internal Waves Workshop, Les Houches, February 2011.

2012: Llewellyn Smith, S. G. Generalizing point vortices. IUTAM Symposium “From Mechanical to Biological Systems – an Integrated Approach”. Izhevsk, June 2012.

- Llewellyn Smith, S. G. & Lacaze, L. The continuous spectrum in the Moore–Saffman–Tsai–Widnall instability. Workshop on Spectral Analysis, Stability and Bifurcation in Modern Nonlinear Physical Systems. Banff, October 2012.

2014: Llewellyn Smith, S. G., Crowdy, D. G. & Freilich, D. V. Hollow vortices. A Journey through Industrial and Applied Mathematics: Celebrating the 80th Birthday of Ellis Cumberbatch. Claremont Graduate University, May 2014.

2015: Llewellyn Smith, S. G. Solving matrix Wiener–Hopf problems numerically via Riemann–Hilbert problems. 1st International Research Meeting on Applied and Computational Complex Analysis (ACCA-BR), Recife, December 2015.

2017: Llewellyn Smith, S. G. Generalizing point vortices. Hassan Aref Memorial Lecture, Virginia Tech University, September 2017.

2018: Llewellyn Smith, S. G. & Luca, E. Solving matrix Wiener–Hopf problems numerically. David Abrahams 60th birthday meeting. Isaac Newton Institute, University of Cambridge. September 2018.

Seminars:

1995: Department of Applied Mathematics, University of Cambridge. Department of Aerospace Engineering, University of Southern California.

1996: Physical Oceanography Research Division, Scripps Institution of Oceanography. Geophysical Fluid Dynamics Summer School, Woods Hole Oceanographic Institution.

1997: Department of Applied Mathematics, University of Cambridge.

1998: Department of Mathematics, University College London. Department of Mathematics, University of East Anglia. Department of Theoretical Mechanics, University of Nottingham. Department of Mathematics, Imperial College. Physical Oceanography, IFREMER, Brest (3 seminars). AMES, University of California, San Diego.

1999: Department of Applied Mathematics, University of Cambridge. OCIAM, Department of Mathematics, University of Oxford. Department of Physics, University of Tokyo; Fluid Dynamics. University of Electro-communication, Tokyo; Fluid Dynamics.

2000: Department of Mechanical and Aerospace Engineering, University of California, Irvine. Geophysical Fluid Dynamics Summer School, Woods Hole Oceanographic Institution.

2001: Physical Oceanography Research Division, Scripps Institution of Oceanography. Department of Aerospace Engineering and Engineering Mechanics, San Diego State University. Ocean Research Institute, University of Tokyo. Research Institute in Applied Mechanics, Kyushu University. Kyushu Institute of Technology. Department of Mathematics, Kyushu University. Applied mathematics in atmosphere-ocean dynamics, Royal Meteorological Society Dynamical Problems Group, Imperial College. Computational Science Research Center, San Diego State University.

2003: Department of Mechanical and Aerospace Engineering, University of California San Diego. GALCIT, California Institute of Technology.

2004: Department of Physics, University of Toronto. Physical Oceanography Research Division, Scripps Institution of Oceanography. Center for Atmosphere Ocean Science, Courant Institute, New York University. Department of Physics, University of California, San Diego. Geophysical Fluid Dynamics Summer School, Woods Hole Oceanographic Institution. Institute of Theoretical Geophysics, University of Cambridge. Department of Mathematics, Imperial College. Laboratoire d'Écoulements Géophysiques et Industriels, Grenoble. Laboratoire de Modélisation en Mécanique, Université de Paris VI.

2005: Laboratoire de Météorologie Dynamique, Ecole Normale Supérieure, Paris. Laboratoire de Physique Statistique, Ecole Normale Supérieure, Paris. Institut de Recherche sur les Phénomènes Hors Equilibre, Marseille. Geophysical Fluid Dynamics Summer School, Woods Hole Oceanographic Institution.

2006: Department of Aerospace and Mechanical Engineering, University of Southern California.

2008: Department of Aerospace and Mechanical Engineering, University of California, Los Angeles.

2009: Department of Mathematics, Harvey Mudd College. Department of Mathematics, Wichita State University. Department of Aerospace Engineering, San Diego State University. Institute of Applied Mathematics, University of British Columbia.

2010: Department of Mathematics, Massachusetts Institute of Technology. Department of Structural Engineering, University of California, San Diego.

2011: Department of Mathematics, University of New Mexico. Institut de Mécanique des Fluides de Toulouse. E.T.S.I. Aeronáuticos, Polytechnic University of Madrid. Department of Mathematics, University of Bristol. Department of Applied Mathematics and Theoretical Physics, University of Cambridge.

2012: Laboratoire d'Hydrodynamique (LadHyX), Ecole Polytechnique. Institut de Mathématiques, Université de Bordeaux 1. Laboratoire d'Écoulements Géophysiques et Industriels, Grenoble. Ecole Normale Supérieure, Lyon. Institut de Recherche sur les Phénomènes Hors Equilibre, Marseille. Department of Mathematics, University of Manchester. Department of Mathematics, University of Leeds. OCIAM, Department of Mathematics, University of Oxford. Department of Mathematics, Imperial College.

2013: GALCIT, California Institute of Technology Department of Mathematics, Louisiana State University. Department of Mathematical Sciences, New Jersey Institute of Technology. Department of Applied Mathematics, University of Colorado, Boulder.

2014: Department of Mathematics, San Diego State University.

2015: Department of Mechanical Engineering, University of California, Santa Barbara. Department of Mechanical and Aerospace Engineering, University of California, Los Angeles. Department of Applied Mathematics (eTalk), University of Washington.

2016: Department of Aerospace and Mechanical Engineering, University of Southern California. Department of Mathematics, University of Wisconsin. Department of Mathematics, University of California, Davis. Department of Physics, University of Texas. Department of Applied Mathematics, University of California, Santa Cruz. Department of Mathematics, University of Michigan. CICESE (Ensenada).

2017: Department of Oceanography, Naval Postgraduate School. Department of Mathematics, University of California, Irvine.

2018: Fluid Mechanics Seminar, Stanford University.

2019: Integrated Applied Mathematics Seminar, University of New Hampshire.

Grants:

2001: *Conversion of the barotropic tide over two-dimensional topography.* Chancellor's Summer Faculty Fellowship Award, University of California, San Diego. \$4,000.

2001–2002: *Biological and chemical implications of dispersion in plumes.* Hellman Fellowship 2001, University of California, San Diego. \$15,000.

2002–2006: *CAREER: Flutter, tumble and fall: extending Maxwell's problem of the falling plate, and using sports as an educational aid in science and engineering.* NSF. \$375,000.

2002–2006: *Topography, TOPEX, and tides,* joint with W. R. Young. NASA. \$342,292.

2004–2009: *CRC: Gas Hydrates: from fundamental theory to hydrogen transport,* joint with K. C. Janda, V. A. Apkarian, K. D. Jordan and W. S. Reeburgh. NSF. \$2,800,000.

2005–2009: *Physics of adaptation: the evolution of dispersivity,* joint with B. J. Glover. Human Frontier Science Program. \$750,000.

2009–2013: *Horizontal convection: the role of turbulence.* NSF \$519,857.

2010–2013: *New exact solutions for vortex rings with swirl and magnetic field,* joint with Y. Hattori. Collaborative Research Project 2010–2013, Institute of Fluid Science, Tohoku University ¥426,000 + 315,000 + 263,000.

2010–2013: *Dynamical Systems Theory and Lagrangian Data Assimilation in 4D Geophysical Fluid Dynamics,* joint with L. J. Pratt, A. Griffa, H. S. Huntley, A. C. Poje, C. K. R. T. Jones, A. D. Kirwan, B. L. Lipphardt, I. Mezić, T. Özgökmen, I. Rypina, S. Scott and E. Spiller. ONR \$231,916.

2010–2013: *Collaborative Research: Beyond Point Vortices: Moving Singularities and Wave Fields in Fluid Mechanics.* NSF \$244,360.

2012–2015: *Sky dancer: a complex fluid-structure interaction system,* joint with A. Cros. UC Mexus \$9,500.

2012–2016: *Real-Time Assimilation Of Ionospheric Data for Tsunami Prediction,* joint with J.-B. Minster and J. W. Rottman. ONR \$413,998.

2013–2015: *Beyond horizontal convection,* joint with K. B. Winters. NSF \$373,388.

2013–2016: *The continuous spectrum in the Moore–Saffman–Tsai–Widnall instability,* joint with Y. Hattori. Collaborative Research Project 2013–2016, Institute of Fluid Science, Tohoku University ¥256,000 + 230,000 + 208,000.

2014–2015: *Interdisciplinary Collaboratory: physics, mathematics and mechanics of the gravity/fluid correspondence,* joint with B. Grinstein, M. Holst and J. McGreevy. UCSD \$35,000.

2015–2019: *Collaborative Research: Riemann-Hilbert problems, Riemann surfaces: computations and applications,* joint with B. Deconinck. NSF \$274,995.

2016–2019: *Instability and Nonlinear Dynamics of Curved Vortices*, joint with Y. Hattori, S. Le Dizès and Y. Fukumoto. Collaborative Research Project 2016–2019, Institute of Fluid Science, Tohoku University ¥645,000 + 404,000 + 968,000.

2017–2020: *The dynamics of buoyant vortices*. NSF \$315,665.

2018–2021: *Collaborative Research: Radiatively Driven Convection in a deep freshwater lake*, joint with J. Austin and A. Scotti. NSF \$387,754.

2019–2022: *MODULUS: Modeling and experimental investigation of protein crowding on lipid bilayers*, joint with P. Rangamani, M. Holst and S. Stachowiak. NSF \$1,010,688.

Postdoctoral scholars advised:

François Pétrélis, 2003 (joint with Bill Young). Now Chargé de Recherche CNRS, Ecole Normale Supérieure, Paris.

Emanuele di Lorenzo, 2003 (SIO, joint with Bill Young). Now Professor, Georgia Institute of Technology.

Wenbo Tang, 2005–2006. Now Associate Professor, ASU.

Vincent Morin, 2006–2007. Now Chercheur, ENS Lyon.

Marcel Ilie, 2008–2009.

Rodolphe Chabreyrie, 2011–2012. Now at Oblon.

Christopher Green, 2014–2015. Now at Macquarie University.

Noé Lahaye, 2014–2016. Now at UBO.

Elena Luca, 2017–2019. Now at UCL.

Graduate students advised:

Erik C. Hurlen *The Motions and Wave Fields Produced by an Ellipse Moving Through a Stratified Fluid*. Ph.D. Department of Mechanical and Aerospace Engineering, UCSD. 2006.

Devin T. Conroy, *Chemically reacting plumes, gas hydrate dissociation and dendrite solidification*. Ph.D. Department of Mechanical and Aerospace Engineering, UCSD. 2008.

Sébastien Michelin, *Falling, flapping, flying, swimming, . . . : high-Re fluid-solid interactions with vortex shedding*. Ph.D. Department of Mechanical and Aerospace Engineering, UCSD. 2009.

Javier Urzay, *Theoretical studies in spiral edge-flame propagation and particle hydrodynamics*. Ph.D. (joint with Forman Williams) Department of Mechanical and Aerospace Engineering, UCSD, 2010.

Roy Barkan, *From Forcing to Dissipation: Kinetic and Available Potential Energy Pathways in Idealized Models of Ocean Circulation* Ph.D. (joint with Kraig Winters), Scripps Institution of Oceanography, UCSD. 2015.

Katarzyna Matusik, *The response of convection driven by surface buoyancy fluxes to surface mechanical forcing* Ph.D. Department of Mechanical and Aerospace Engineering, UCSD. 2015.

Yue (Cynthia) Wu, *The Propagation of Tsunami-Generated Internal Waves in the Atmosphere*, Ph.D. Department of Mechanical and Aerospace Engineering, UCSD. 2018.

Ching Chang, *Vortex Motion and Stability with Density Variation, Buoyancy and Surface Tension*, Department of Mechanical and Aerospace Engineering, UCSD. 2020.

Todd Christopher, Department of Mechanical and Aerospace Engineering, UCSD. 2016–.

Jennifer Fromm (joint with Padmini Rangamani), Department of Mechanical and Aerospace Engineering, UCSD. 2018–.

Tianyi Chu (joint with Oliver Schmidt), Department of Mechanical and Aerospace Engineering, UCSD. 2019–.

Graduate research projects advised:

Océane Arboune, Ecole Normale Supérieure de Lyon. 2002.
Alexandre Paci, Météo France. 2003.
Pierre Augier, Ecole Normale Supérieure de Lyon. 2005.
Pierre Boivin, Ecole Polytechnique. 2006.
Thomas-Jérémie Sablong, Institut Français de Mécanique Avancée. 2007.
Alexis Cuquel, ENSTA, 2009.
Benjamin Bécler, Ecole Normale Supérieure de Lyon. 2011.
Anne-Laure Henri, Institut des Sciences de l'Ingénieur de Toulon et du Var. 2011.
Hugo Dubos, Institut des Sciences de l'Ingénieur de Toulon et du Var. 2011.
Raoul Dekou (joint with Laurent Lacaze), Université Paul Sabatier (at IMFT). 2012.
YongOu Zhang, Huazhong University of Science and Technology, 2014–2015.
Lison Balsalobre, Ecole Centrale de Paris. 2016.
Yu Chen, Fudan University, 2016.
Qian Shi, Fudan University, 2016.
Jiahao Gong, UCSD. 2018.
Antoine Pallois (joint with James Friend), Ecole Polytechnique. 2018.

Undergraduate research projects advised:

Norma Sagrero, UCSD. 2000.
Ridder Manzanet, UCSD. 2001.
Denise Bogard, UCSD. 2003–2004.
Jeremy Beer, UCSD. 2003–2004.
Jason Korniski, UCSD. 2004.
Patrick Sanan, UCSD. 2005.
Andrew Ulvestad, UCSD, 2008.
Tien-Hao (Tim) Lai, UCSD, 2008.
Gary Ka-Hay Ng, UCSD, 2011.
Stefanie Perez, UCSD, 2013–2014.
Joseph Adachi, UCSD, 2013–2015.
Steven Gagniere, UCSD, 2013–2015.
Emma Schoenthal, UCSD, 2017.
Zinan Hu, UCSD, 2019–2020.
Brandon Li, UCSD, 2019–2020.
Katie Freitag, UCSD, 2020.

Student committees:

Daniel Mahoney *A Numerical Study of the Effects of Stratification on the Short-Wave Instability in a Vortex Pair*. M.S., Department of Mechanical and Aerospace Engineering, UCSD. 2002.

Hideaki Tsutsui *Evolution of a Counter-Rotating Vortex Pair in a Stably Stratified Fluid*. M.S., Department of Mechanical and Aerospace Engineering, UCSD. 2003.

S. G. Llewellyn Smith - CV

Outreach:

2005: Mysteries of Water Institute, University of California, Irvine (aimed at high school chemistry teachers).

2010: Scripps Institution of Oceanography GK12 program (Earth sciences workshop for SDUSD high school teachers).

2017: San Diego State University REU Program (aimed at math undergraduates).

2018–2020: Outreach to High School math teachers with UCSD CREATE.
